CYBERNETICS
Volume 6, Numbers 1-6, 1970
(A translation of Kibernetika)

Volume 6, Number 1 January-February, 1970

	Eng.	Russ.
Certain Problems of Stochastic Programming—Yu. M. Ermol'ev	1	1
Utilization of the Operation of Space Dilatation in the Minimization of Convex Functions —N. Z. Shor	7	6
[Report on the Algorithmic Language Algol 68—A. van Wijngaarden, B. J. Mailloux, J. E. L. Peck, and C. H. A. Koster		12]

Volume 6, Number 2 March-April, 1970

Some Problems in the Theories of Automata and Artificial Intelligence—V. M. Glushkov	3	17
Functional Equivalence of Discrete Processors. II—A. A. Letichevskii	14	28
Rudimentary Interpretation of Two-Tape Turing Computation—V. A. Nepomnyashchii	29	43
A Combined Model for the Maximum Current Problem—V. V. Vasil'ev	36	51
Calculating Communication Links in Electronic Digital Computer Circuits and Components—O. V. Tozoni	39	54
Effect of the Depth of Formulas on Their Complexity—O. B. Lupanov	46	62
Metalanguage Oriented towards Syntactic Analysis and Control—I. V. Vel'bitskii and E. L. Yushchenko	50	67
Differential Games of Prescribed Duration—B. N. Pshenichnyi and M. I. Sagaidak	54	72
Optimal Control of Stochastic Processes—Yu. M. Ermol'ev	64	84
Priority Intervals in Ordering Problems—V. V. Shkurba	77	98
Convergence Rate of the Gradient Descent Method with Dilatation of the Space —N. Z. Shor	80	102
Dynamic Multi-branch Model of Production (Model π)—Yu. P. Ivanilov and A. A. Petrov	86	109
A Method of Recognition Learning—V. D. Mazurov	92	116
On the Number of Irreducible Covers of a Graph by Edges—R. G. Nigmatullin	95	120
Concept Formation by Learning in Growing Networks—V. P. Gladun	99	124
A Model of Optimization in the Formation of Speech—L. S. Lozinskii	105	131
The Problem of Constructing a Mathematical Guarantee of a Computing Process on a Digital Computer—I. V. Sergienko	108	135
Design of an Automatic Statistical Data Processing System—I. V. Sergienko, N. I. Tukalevskaya, A. A. Mikhailishin, and I. N. Parasyuk	117	145
Tolerance Spaces—Yu. A. Shreider	124	153
Principles of Construction of Program Libraries and Requirements Towards Computers—I. N. Molchanov	129	159
A Method of Organizing a Computing Process in Operational Systems—V. A. Mikhailov	141	173
SCIENTIFIC INFORMATION		
Information Methods in Systems for Control, Measurement, and Monitoring—I. N. Savin	149	182
First Conference on Use of Mathematical Modelling and Statistical Methods to the Analysis and Synthesis of Integral Schemes and Engineering of Microelectronics —V. A. Grebnev	151	186

Volume 6, Number 3 May-June, 1970

On the Specification of Automata by Means of a Microprogram – A. T. Mishchenko	189	1
On a Form of Expansion of Partial Boolean Functions – I. I. Brona	200	11
On the Question of Quantitative Characteristics of Logical Formulas – M. I. Liogon' – M. I. Liogon'kii	205	16
Representation of 2-Events in Finite Automata – B. G. Mirkin	212	23
The Number of States of the Product of Automaton Mappings – Peter Horvath	215	26
Decomposition Method of Structural Synthesis of Finite Automata. II. – A. N. Melikhov, L. S. Bershtein, and N. G. Topol'skii	223	32
On the Imbedding of Asynchronous Automata into a Product of Finite Automata – É. A. Vartspetov	231	39
On Synthesis of Threshold Elements by the Approximation Method – V. P. Pyatkin	233	41
Estimation of the Complexity of Decoding Circuits – O. N. Yurin	238	45
Certain Problems in Controlling an Electromagnetic Field – Yu. I. Samoilenko	242	48
Investigation of the Computing Process on a Promin' Type Computer and a Method of Increasing the Effective Speed of this Class of Machines – Yu. V. Blagoveshchenskii, B. A. Popov, I. V. Sergienko, and G. S. Tesler	250	54
Simulation of Vector Random Processes in Problems of Reliability Prediction – V. D. Kudritskii	256	59
Investigation of Stochastic Extremal Problems by Means of Functional Analysis – V. M. Efimov	261	63
Extremal Problems in Planning Operations of Computer Complexes – A. V. Barskii	269	69
Language of a Complex of Programming Systems – V. A. Mikhailov	275	74
An Algorithm for Solving a Convex Programming Problem with Linear Constraints – B. N. Pshenichnyi and I. F. Ganzhela	284	81
Keni Mano's Problem – A. Ya. Petrenyuk	291	86
An External Sorting Method – F. D. Kozhurin	295	89
Random Walks on a Finite Oriented Graph – S. V. Troyanovskii and V. R. Krasheninnikov	300	93
Nonlinear Filtering for the Solution of Certain Stochastic Differential Equations – A. D. Shatashvili	305	97
Attainability in Positional Graphs – V. V. Rozen	312	103
The Solution Set of a Mathematical Programming Problem with Incomplete Information – M. A. Dukhovnyi	316	107
Minimization of Nonlinear Functionals for Constrained Problems – Yu. M. Danilin	320	110
Estimating the Number of Variants in the Solution of a Certain Class of Problem – É. I. Volynskii and Z. E. Mednik	330	118
Concerning the Theory of Nonlinear Minimax Problems – V. N. Malozemov	334	121
Dual Control with an Adjustable Checking Interval – E. P. Maslov	340	126
BRIEF COMMUNICATIONS		
Difficulty of Translating the Languages Used to Record Formulas – V. G. Bodnarchuk and G. P. Kozhevnikova	349	134
Program for the Computer Solution of the Equations of Nonlinear Mechanics Using Input Language Analitik – Yu. V. Blagoveshchenskii and Yu. S. Fishman	351	135
A Schedule Construction Problem – Yu. A. Mikheev	353	136
Overflow of the Numerical Range in Multiplication Using Residue-Class Arithmetic – V. A. Vyshinskii, I. G. Moroz, and V. D. Petushchak	355	137
On Simulation in Homogeneous Media – A. Ya. Makarevskii	358	139
Ralization of Mappings of Cellular Automata – A. Ya. Makarevskii	359	139
LETTERS TO THE EDITOR		
Note on the Work of V. K. Leont'ev, "One Problem in Economics" – Yu. Yu. Finkel'shtein	360	141

	Engl.	Russ.
SCIENTIFIC INFORMATION		
Information Robot-Manipulators – M. B. Ignat'ev and I. V. Safonov	361	142

Volume 6, Number 4 July-August, 1970

Software for an Automatic System of Design of Computers and Systens (PROEKT) –V. M. Glushkov, Yu. V. Kapitonova, and A. A. Letichevskii	363	1
Automatic Programming in the "PROEKT" System–V. M. Glushkov, N. M. Grishchenko, Yu. V. Kapitonova, and A. A. Letichevskii	369	7
On the Formalization of the Concept of an Experiment with an Automaton –M. A. Spivak	377	14
On One Method of Specifying Controlling Automata–A. N. Chebotarev	382	19
Algorithm of Decomposition in Finite Symmetric Semigroups–V. G. Bondarev	388	24
Bound on Complexity of Realization of a Linear Function by Formulas in Certain Bases –B. A. Muchnik	395	29
Structure of Modified Post Albegra and Its Properties–G. E. Tseitlin	407	39
Investigating Executability of Programs–Laslo Gyurish	423	55
Asymptotic Mean Number of Dead-End Tests–V. A. Slepyan	425	57
Optimization of Operator Programs Combining Operations with Memory and Module Allocation–A. S. Nikitin	437	66
Diagnostic Problem for an Automaton with a Random-Signal Input Source –A. S. Barashko	445	73
Optimal Synthesis of Special-Purpose Devices Operating in a Real Time Scale –A. V. Palagin and Yu. S. Yakovlev	450	77
Determination of the Positional Characteristics of Numbers in a Remainder-Class Number System Using Threshold Networks–V. M. Amerbaev and V. V. Ovchinnikov	454	80
Failure Flux with Random Operating Regime and the Presence of Running-In Periods –M. A. Yastrebenetskii and B. L. Solyanik	459	85
Schedules on Graphs and Independent Sets of Graphs–A. I. Kuksa	467	92
Necessary Minimax Conditions on Related Sets–A. I. Sotskov	472	96
Analytical Description of Geometrical Shapes–O. V. Zenkin	481	103
One Extremal Problem–V. N. Malozemov	490	111
Minimization of Function Defined on a Tree–L. M. Frid	496	115
Algorithm for Optimizing the Arrangement of Data Files on Magnetic Tape –V. A. Litvinov	502	120
Certain Forecasting Problems in Managing Scientific Research and Development –N. E. Arkhangel'skii, D. I. Golenko, N. G. Fomicheva, and É. V. Shirvinskii	507	124
Optimum Partitioning of a Sequence of Elements into Subsequences–T. K. Vintsyuk	512	128
BRIEF COMMUNICATIONS		
The Extremal Properties of the Simplest Model for the Infection Process –L. A. Rvachev	519	134
Logical Analysis of Associative Memory Structures–Yu. Ya. Kochin	522	135
On Maximal Quadratic Mano Configurations–A. Ya. Petrenyuk	525	137
Extension of the Stability Concept in Linear Programming–N. I. Arbuzova and V. L. Danilov	527	139
SCIENTIFIC INFORMATION		
Reliability Synthesis of Digital Automata–Yu. V. Kapitovnova and I. V. Safonov	530	141
First Olympiad of Young Amateurs of Cybernetics of the Little Academy of Sciences of the Crimea, "Iskatel'" ["Seeker"]–V. F. Evdokimov	533	142

Volume 6, Number 5 September-October, 1970

Decompositions of Partial Boolean Functions—I. I. Brona	535	1
Synthesis of Threshold Circuits for Certain Classes of Boolean Functions—N. P. Red'kin.	540	6
Pushdown Automata with Complementary Registers—V. Yu. Meitus	545	10
On a Certain Class of Automata Having a Simple Realization—A. Ya. Makarevskii	556	20
Equivalence of Certain Computation Devices—N. N. Katerinochkina	563	27
Algebraic Simulation of Mathematical Machines—V. N. Lifshits and V. D. Rozenknop	569	32
Adaptation Processes in Service Arrays of Automated Control Systems—V. M. Glushkov and L. S. Lozinskii	575	37
On Planning the Solution Process for a Problem on a Computer Complex —M. F. Kaspshitskaya and I. V. Sergienko	579	41
On Choosing the Search Modes for Rows of Information on Magnetic Tape —V. A. Litvinov	585	46
Several Types of Positional Function Codes—S. I. Khmel'nik	590	50
Optimal Control of a Semi-Markov Process in the Presence of Constraints on State Probability—I. B. Gertsbakh	597	56
The Remainder Term of a Trigonometric Interpolation Expression for Equally Spaced Nodes in Spectral Form—V. A. Kunitsa	605	62
Automatic Segmentation of Initial Information in a Data Processing Translator —V. V. Shurakov and A. A. Zemlyanskii	616	72
On the Finite-Difference Method in Control Problems for Systems with Distributed Parameters—V. P. Gulenko and Yu. M. Ermol'ev	627	81
Some Questions in the Simulation and Estimation of the Operation of Complex Systems —D. I. Golenko, N. E. Arkhangel'skii, M. K. Babunashvili, M. N. Ponomarev, and É. V. Shirvinskii	631	84
Application of Associated Semi-Markov Processes to the Analysis of System Reliability. I—S. M. Brodi and V. D. Shpak	638	90
Stability Study of Multivariate Control Systems with Pulse-Frequency Modulation —V. M. Kuntsevich and Yu. N. Chekhovoi	648	97
Note on an Approximate Criterion for Verifying an Hypothesis on the Mean Value of a Gaussian Process—D. Shagdar	656	103
Some Properties of Plane Rooted Trees—I. V. Konoval'tsev and E. P. Lipatov.	660	106
One Generalization of the Grundy Graph—A. P. Varvak	668	112
Peculiarities of Extrapolation by Summed Values of Random Functions —A. N. Efimov and V. G. Rubanov	673	117
Algorithms for General Mathematical Programming Problems—B. N. Pshenichnyi	677	120
Nonlinear Game Problem with Opponent Restricted within Circle—G. A. Belkin	685	126
A Limit Theorem for Classes of Nonlinear Integer Programming Problems. I —V. A. Malyshev	690	130
BRIEF COMMUNICATIONS		
Construction of Compensated Incomplete Block Diagrams with the Aid of Mano Configurations—A. Ya. Petrenyuk	701	139
Some Systems Complete in P_k — V. I. Klevachev	702	139
SCIENTIFIC INFORMATION		
Symposium "Principles of Probabilistic Organization of Behavior, Discernment, and Medical Diagnostics"—A. B. Kotova and V. M. Yanenko	704	141

Volume 6, Number 6 November-December, 1970

150th Anniversary of the Birth of Friedrich Engels.	707	1
Languages for Automated Computer-Design Systems (Proekt)—V. M. Glushkov, Yu. V. Kapitonova, and A. A. Letichevskii	708	3
The Length of Minimum Tests for Rectangular Tables. I—A. D. Korshunov	723	17

	Eng.	Russ.
Certain Estimates of the Time of Computations on Turing Machines with an Input —M. K. Valiev	734	26
The Equivalence of Logic Schemes with Rearranged Operators—V. A. Tuzov	742	33
Realization of Mappings by Cellular Automata—A. Ya. Makarevskii	750	39
The Stability of Internal States of a Probabilistic Automaton—N. Ya. Parshenkov and V. M. Chentsov	759	47
Multiple Recursions Bounded in the Class of Primitive Recursive Functions —S. S. Marchenkov	766	53
An Axiom of Mathematical Utility Theory—B. G. Mirkin	776	60
Upper Bound of the Informational Redundancy Measure of a Symmetric Semigroup —V. A. Ganov	780	63
Effect of the Load Capacity of Threshold Elements on the Complexity of Circuits —N. P. Red'kin	783	66
Convergence Rate of a Generalized Gradient Method—O. V. Guseva	786	68
Estimate of Computer Sorting by the Shell Method—S. I. Kozlova and V. N. Mikhailov	790	71
Autocorrelation Function of the Output Signal from a Filter with Random Time Quantization under Breakdown Conditions—G. T. Artamonov	794	74
Evaluation of the Error in Recovering Analog Signals in Pulse Systems —V. S. Godlevskii	800	79
Use of Natural Informational Redundancy for Self Error Correction in Logical Nets —Yu. G. Savchenko	808	85
On the Formation of Data Blocks in a Control System—L. S. Lozinskii	811	88
Analysis of an Inventory-Control System by Means of a Semi-Markov Process —T. I. Fursova	817	93
Nonstationary Linear Differential Games. Part 1—M. S. Nikol'skii	822	98
A New Algorithm for Finding Optimal Stationary Control in a Semi-Markov Solution Process—V. Z. Belen'kii	826	102
On Potentialities of Learning Matrices of Steinbuch—N. N. Mailyan	833	108
The Mean Square Deviation of a Trigonometric Interpolation Polynomial from Functions Being Interpolated in the Case of Equally Spaced Nodes —V. A. Kunitsa	840	113
On the Comparison of Tests for Optimization of Adaptive Pattern Recognition Systems —A. I. Galushkin, L. S. Zak, and B. P. Tyukhov	850	122
On the Number of Graphs for Which a Given Permutation Group Is the Automorphism Group—M. Kh. Klin	862	131
Schedule Optimization by the Method of Directed Search—D. I. Golenko and Yu. Ya. Tarnopol'skii	871	138
Optimal Allocation of Resources in Network Planning by the Method of Minimal Flow—L. E. Kornilova	879	145
